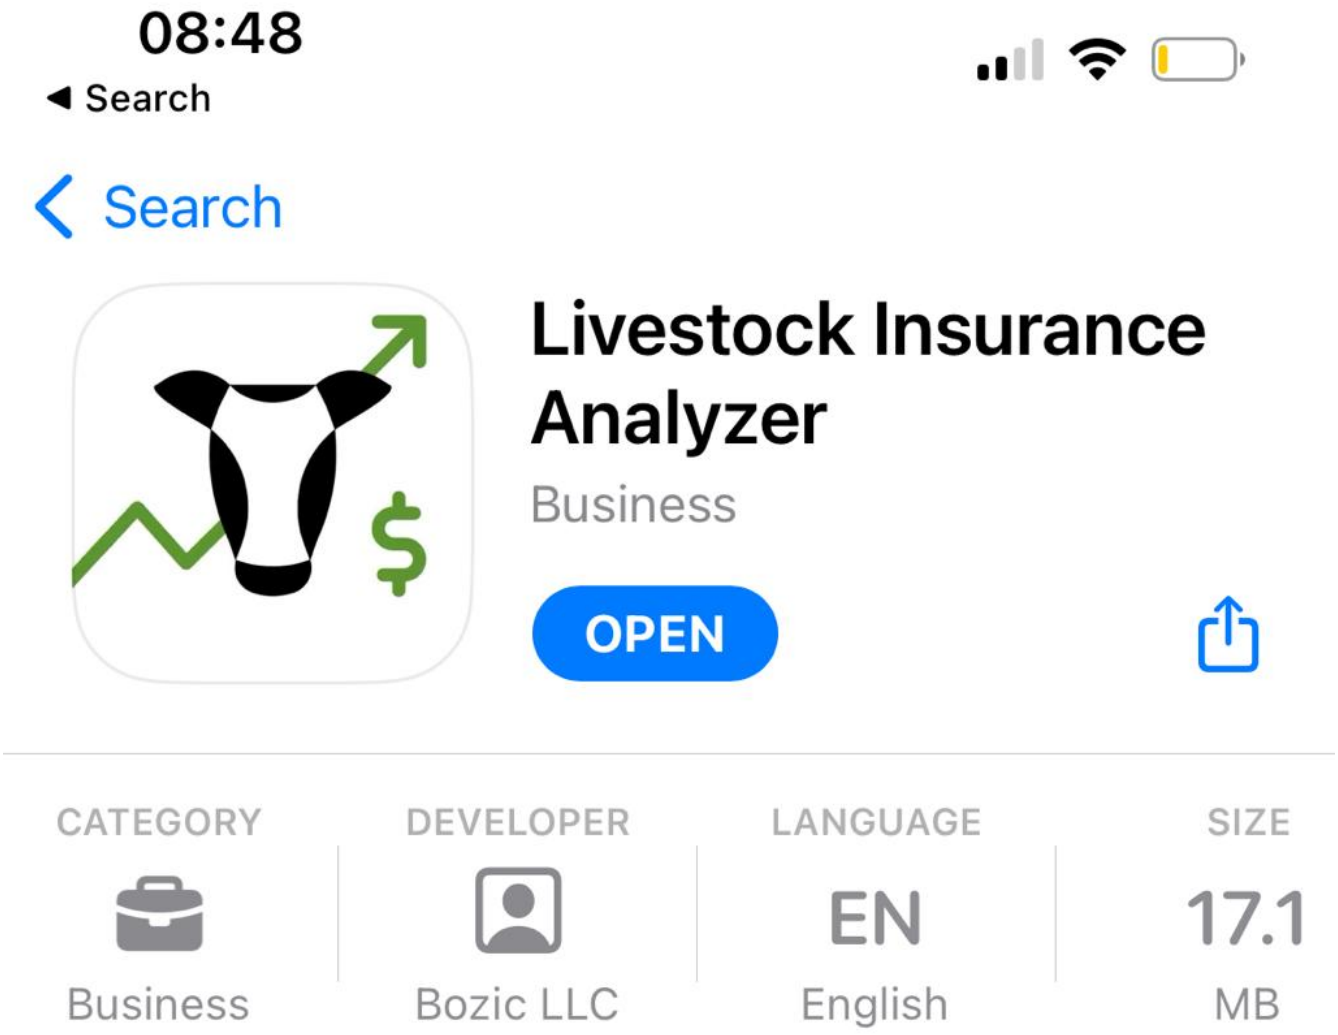
LIA Mobile app for iOS

We are excited to introduce the new version of Livestock Insurance Analyzer (LIA) iOS application, designed to offer a more modern and user-friendly experience. Our focus has been on delivering a robust application with improved functionality and user-friendly features.



In this update, we've made significant improvements to the application, bringing you an enriched experience.

We've developed significant enhancements for the **DRP Insurance plan**. Users now have greater flexibility, allowing them to modify parameters without storing them as defaults. Additionally, we've enabled users to change and save their operation preferences. Improved options for accessing existing endorsements, reviewing historical analysis, and utilizing the What If Analysis that enables you to see prices and their historical and potential future changes.

In conjunction with new improvements, we've fine-tuned and adapted various existing features for a more user-friendly experience. Users will notice enhancements across the application, including streamlined navigation, improved View Quarters functionality, and more.

System Wide

✨ Notification Display only for operations where you are a Primary Agent

@maja.pilipovic, @marin.ladovic, @filip.cogelja

We've implemented a notification display for agents when they are the Primary Contact for operations in LIA that are matched in AIP with unsynchronized endorsements. The number that will display if there is at least one operation in LIA assigned to a matching operation in AIP, with at least one endorsement that is not synchronized with AIP and logged in Agent is Primary Contact.

✨ Display of AIP Sync Operations Only for Current RY

@maja.pilipovic, @marin.ladovic, @filip.cogelja

We've implemented the update to the operation AIP sync display, ensuring that only operations relevant to the current Reinsurance Year (RY) are showcased within the AIP sync modal.

- 🐛 Fixed the problem in the Admin panel where lengthy text in certain fields disrupted the display. Now, text is forcibly wrapped into multiple lines to ensure it fits within the maximum width of the column. @leon.cvrtila

🔧 Improvements

- 🐛 We've fixed the issue for duplicate check functionality for online binding coverage requests. Now, when a request is rejected from AIP, it will no longer be included in the duplicate check, ensuring a more accurate and streamlined process. @maja.pilipovic, @marin.ladovic, @mislav.sirac

LRP

✨ Removed columns in Active Endorsements summary table

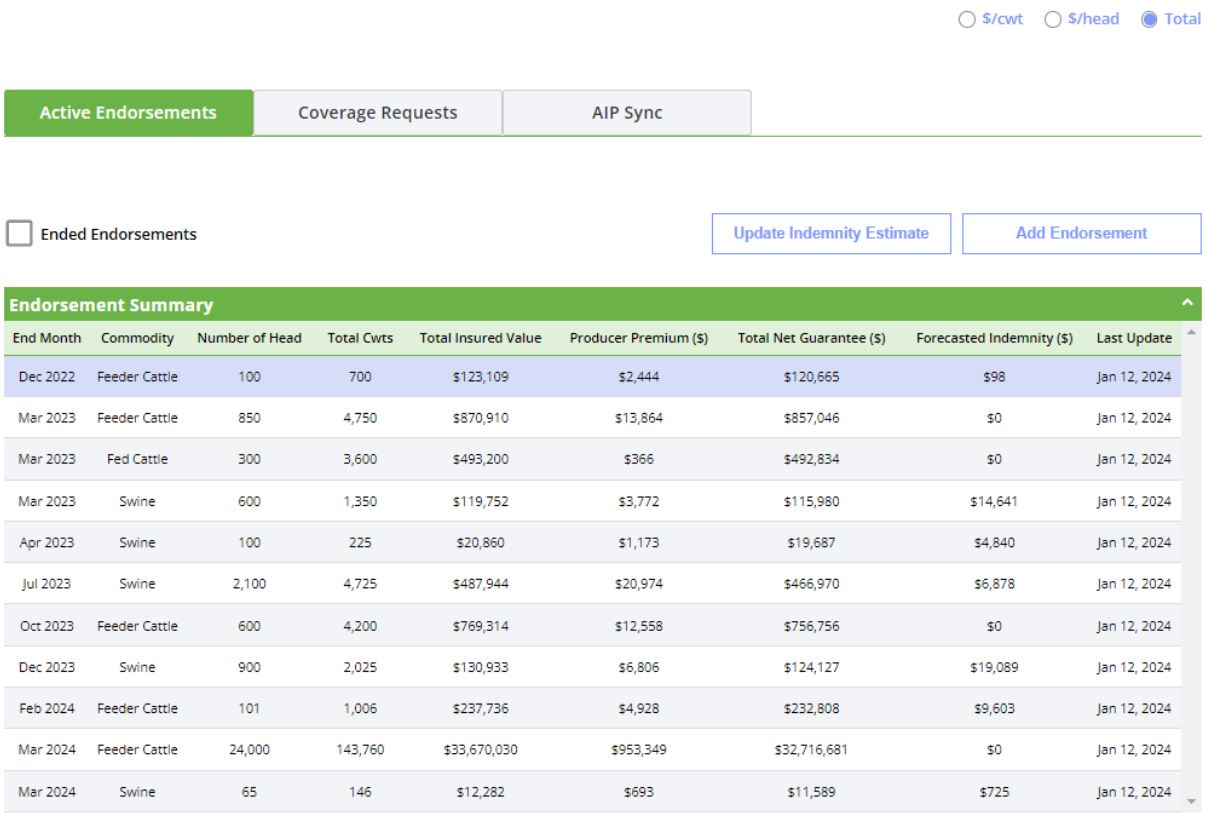
@leon.cvrtila

We've implemented a tailored adjustment to the Endorsement summary table, dynamically removing irrelevant columns when switching between different values. Selecting $/cwt hides the Producer Premium ($/head) column, choosing $/head removes the Producer Premium ($/cwt) column, and opting for Total removes both Producer Premium ($/cwt) and Producer Premium ($/head) columns. This enhancement ensures a cleaner and more focused user experience.

✨ Changed Display Format for Values in LRP Active Endorsement Tab

@luka.trdina

We've implemented formatting adjustments on the Endorsements' Active Endorsement tab within the LRP Insurance plan to enhance the readability of numerical data, Specifically, commas are now inserted into the values for 'Number of Head' and 'Total Cwts.' Additionally, for other values displayed when 'Total' is selected are rounded them to whole numbers. These refinements contribute to a clearer presentation of data for an improved user experience.



End Month	Commodity	Number of Head	Total Cwts	Total Insured Value	Producer Premium ($)	Total Net Guarantee ($)	Forecasted Indemnity ($)	Last Update
Dec 2022	Feeder Cattle	100	700	$123,109	$2,444	$120,665	$98	Jan 12, 2024
Mar 2023	Feeder Cattle	850	4,750	$870,910	$13,864	$857,046	$0	Jan 12, 2024
Mar 2023	Fed Cattle	300	3,600	$493,200	$366	$492,834	$0	Jan 12, 2024
Mar 2023	Swine	600	1,350	$119,752	$3,772	$115,980	$14,641	Jan 12, 2024
Apr 2023	Swine	100	225	$20,860	$1,173	$19,687	$4,840	Jan 12, 2024
Jul 2023	Swine	2,100	4,725	$487,944	$20,974	$466,970	$6,878	Jan 12, 2024
Oct 2023	Feeder Cattle	600	4,200	$769,314	$12,558	$756,756	$0	Jan 12, 2024
Dec 2023	Swine	900	2,025	$130,933	$6,806	$124,127	$19,089	Jan 12, 2024
Feb 2024	Feeder Cattle	101	1,006	$237,736	$4,928	$232,808	$9,603	Jan 12, 2024
Mar 2024	Feeder Cattle	24,000	143,760	$33,670,030	$953,349	$32,716,681	$0	Jan 12, 2024
Mar 2024	Swine	65	146	$12,282	$693	$11,589	$725	Jan 12, 2024

DRP

✨ Enhanced Price Report Logic

@maja.pilipovic, @marin.ladovic, @mislav.sirac, @luka.ferlez

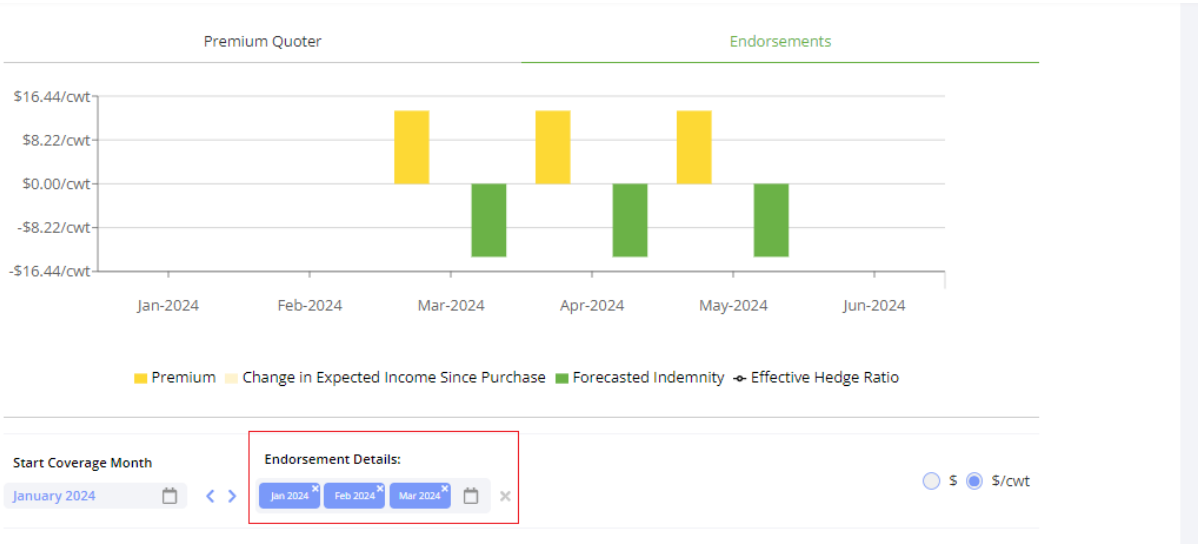
We've refined the system logic to ensure that the Price report now takes the last available price when calculating differences, addressing scenarios where the price for the previous day is not available. This improvement enhances the accuracy of the Price report.

LGM

✨ Default Display of Three Months on Endorsement Page

@maja.pilipovic, @marin.ladovic

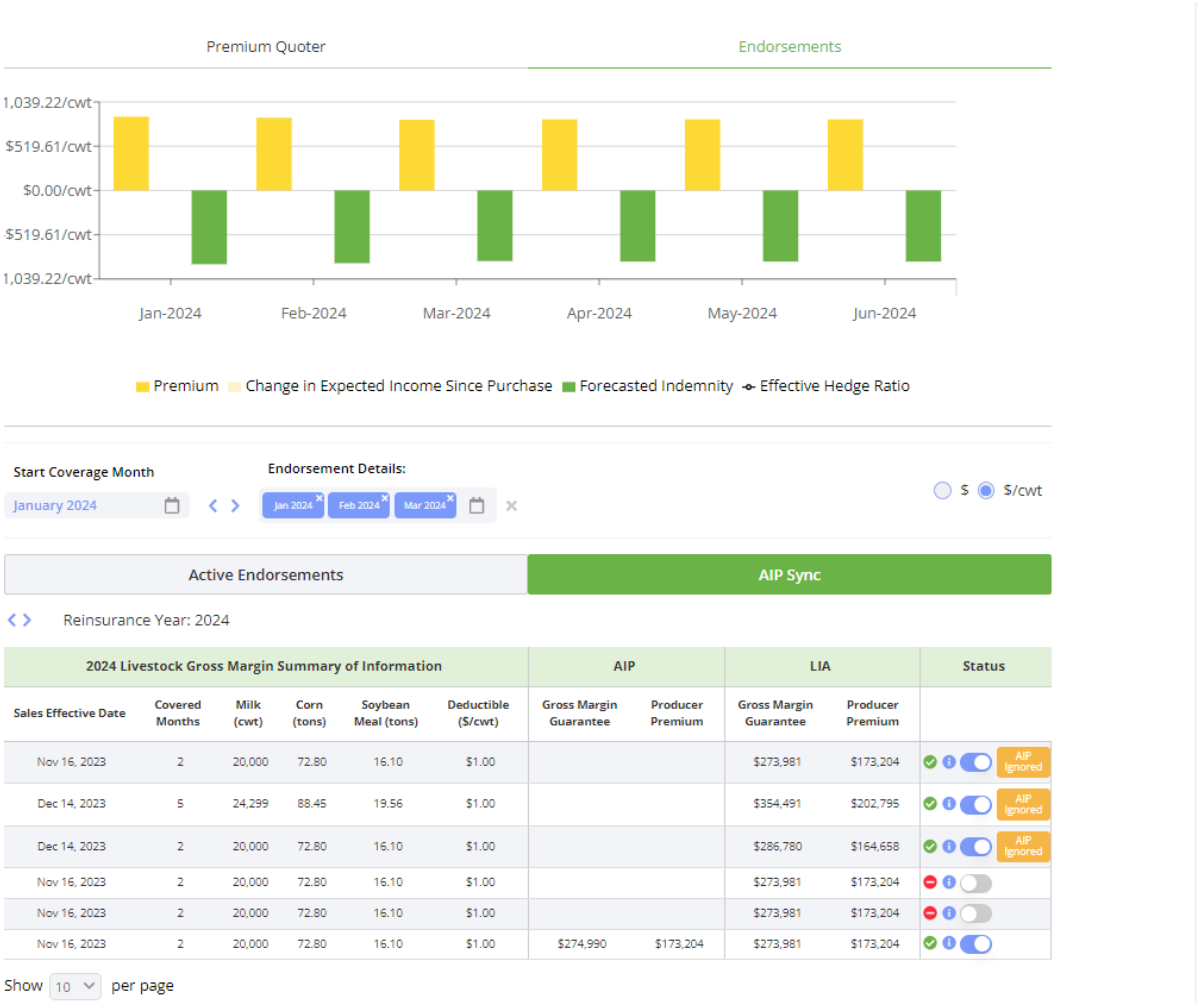
We've implemented the display of three months by default on the LGM Endorsement page. Now, users will immediately see the current month along with the following two months in the future, providing a more convenient and efficient overview.



✨ LGM AIP Sync tab

@maja.pilipovic, @marin.ladovic, @filip.cogelja, @leon.cvrtila

We've implemented a dedicated tab within LGM Insurance plan to display all LGM synced endorsements with AIP. Now, agents can easily access an overview of endorsements per reinsurance year, including all relevant information,comparison of coverage price and producer premium in LIA and AIP and have the ability to modify the status as needed.



🔧 Improvements

- 🐛 Fixed the issue in the LGM insurance plan's Premium Quoter What-If table, where the actual gross margin was displaying incorrect values. The correct values are now displayed, ensuring accurate representation. @marin.ladovic
